Archive and Concentrate Synchrophasor Information Using SEL's Innovative Phasor Data Concentrator

PULLMAN, WA — July 20, 2010 — Schweitzer Engineering Laboratories, Inc. (SEL) today announced the release of the new SEL-5073 SYNCHROWAVE[®] Phasor Data Concentrator (PDC) Software with archiving capability. The software-based PDC is designed with an intuitive user interface, providing a breakthrough in ease of use, setup, and configuration.

The new software runs on Windows[®]-based computing hardware, and includes several innovative features:

- Data concentration for more than 100 PMU inputs
- Archiving of phasor data locally on the computer running the software
- Six user-configurable output data streams
- Built-in NERC CIP security features, including individual and role-based account authentication, access logs, and strong passwords
- Ease of use in setting up and configuring the PDC using the included PDC Assistant

One popular application is using the flexible archiving capability of the PDC as part of a solution to meet NERC PRC-002 disturbance recording system requirements. Other applications include using the PDC as part of wide-area visualization, awareness, and protection systems for improving electrical transmission grid reliability.

SEL is now accepting orders for the SEL-5073 SYNCHROWAVE PDC Software, available for a base price of \$4000. The software is backed by SEL's renowned personalized service and ongoing technical support, consistently ranked by electric utility customers as best in the industry. For more information on features, benefits, and applications, visit www.selinc.com/p118.

SEL serves the power industry worldwide through the design, manufacture, supply, and support of products and services for power system protection, monitoring, control, automation, and metering. SEL offers an unmatched worldwide, ten-year product warranty, and a commitment to making electric power safer, more reliable, and more economical.
