1. Introduction .................................................................................................................. 5

2. Logical Nodes List ........................................................................................................ 6

3. Logical Node Extensions ............................................................................................... 7
   3.1. Extended Logical Nodes .......................................................................................... 7
       3.1.1 G Gio Generic Process I/O .............................................................................. 7
1. Introduction

This model implementation conformance statement is applicable for SEL-2440 and SEL-2440-0, with firmware R207:

This MICS document specifies the modelling extensions compared to IEC 61850 edition 1. For the exact details on the standardized model please compare the ICD substation configuration file: “02440 003.ICD”, version R106.

Clause 2 contains the list of implemented logical nodes. Clause 3 describes the extended logical nodes.
2. Logical Nodes List

The following table contains the list of logical nodes implemented in the device:

<table>
<thead>
<tr>
<th>L: System Logical Nodes</th>
</tr>
</thead>
<tbody>
<tr>
<td>LPHD (Physical device information)</td>
</tr>
<tr>
<td>LLN0 (Logical node zero)</td>
</tr>
<tr>
<td>G: Logical Nodes for generic references</td>
</tr>
<tr>
<td>Ggio (Generic process I/O)</td>
</tr>
</tbody>
</table>
3. Logical Node Extensions

The following table uses
- M: Data is mandatory in the IEC-61850-7-4.
- O: Data is optional in the IEC-61850-7-4 and is used in the device.
- E: Data is an extension to the IEC-61850-7-4.

3.1. Extended Logical Nodes

The following logical nodes have been extended with extra data. All extra data has been highlighted in the tables and marked as “E” (Extended), these data contains the “dataNs” attribute.

3.1.1 G Gio Generic Process I/O

<table>
<thead>
<tr>
<th>Attribute Name</th>
<th>Attribute Type</th>
<th>Explanation</th>
<th>M/O/E</th>
<th>Remarks</th>
</tr>
</thead>
<tbody>
<tr>
<td>Measured Values</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Ra</td>
<td>MV</td>
<td>Remote analog</td>
<td></td>
<td>E</td>
</tr>
</tbody>
</table>
