TISSUES Implementation Conformance Statement
for the IEC 61850 interface in SEL-787

June 10, 2011

UCA International Users Group
Testing Sub Committee

Template version 0.2
Date: October 7, 2008
Introduction

This document provides a template for the tissues conformance statement. According to the UCA IUG QAP the tissue conformance statement is required to perform a conformance test and is referenced on the certificate.

This document is applicable for SEL-787 with firmware version R206.

Mandatory Intop Tissues

During the October 2006 meeting IEC TC57 working group 10 decided that:

- green Tissues with the category “IntOp” are mandatory for IEC 61850 edition 1
- Tissues with the category “Ed.2” Tissues should not be implemented.

Below table gives an overview of the implemented IntOp Tissues.

<table>

</tbody>
</table>

NOTE: Tissue 49, 190, 191, 275 and 278 are part of the optional tissue #453, all other technical tissues in the table are mandatory if applicable.

NOTE: Editorial tissues are marked as “na”.

NOTE: Final proposal on tissue 45 is not defined yet

Optional IntOp Tissues

After the approval of the server conformance test procedures version 2.2 the following IntOp tissues were added or changed. It is optional to implement these tissues.

<table>
<thead>
<tr>
<th>Part</th>
<th>Tissue Nr</th>
<th>Description</th>
<th>Implemented</th>
</tr>
</thead>
<tbody>
<tr>
<td>8-1</td>
<td>246</td>
<td>Control negative response (SBOns) with LastApplError</td>
