

SEL-5056 Host ID and License Activation

SEL-5056 Host ID

The following process describes how to obtain the Host ID for the SEL-5056 Software-Defined Network (SDN) Flow Controller. The Host ID can be used in conjunction with the Activation ID to generate a license file. Note that this method applies to version 1.5 and later. For assistance with previous versions, contact Technical Support.

- Step 1. After you have successfully installed SEL-5056, open Google Chrome, navigate to the user interface, and log in using the credentials configured during installation.
- Step 2. Navigate to the **Licensing** page by using the navigation tree on the left side. The Host ID appears at the top of the page. The Host ID is in the hexadecimal format (SEL=XX-XX-XX-XX-XX-XX-XX-XX) for which zeros (but not letter Os) are permissible. Use this format when entering the Host ID in the End User Portal.

License Generation

When you have a Host ID that you can use in conjunction with the Activation ID to generate a license, follow the instructions on the SEL website (selinc.com/products/software/licensing-information/) to complete the license generation process.

SEL-5056 License Activation

The following process describes how to activate the SEL-5056 with the license file.

- Step 1. Log in to the SEL-5056 as a Security Administrator.
- Step 2. Navigate to the **Licensing** page.
- Step 3. Select **Choose File** and navigate to the license file.
- Step 4. Select the license file and select **Upload License**.

The webpage should update with an active license and display the allowed number of nodes to manage.

Technical Support
