Major Features and Benefits

The SEL-734B combines volt/VAR based capacitor bank control with power quality monitoring and advanced reporting through Ethernet and multiple serial ports.

The SEL-734B can be configured with low-energy analog (LEA) inputs for voltage and current sensing to connect industry standard current and voltage sensors. The SEL-734B can also be configured with voltage and current inputs to connect voltage transformers, current transformers, or industry standard voltage and current sensors.

➤ **One Controller, Many Applications.** The SEL-734B adapts to multiple applications ranging from basic three-pole control to intelligent single-pole control. Configurable logic and integrated communications ensure that the SEL-734B supports future system demands.

➤ **Preconfigured Control Strategies.** SEL offers a selection of ACSELERATOR QuickSet® SEL-5030 Software templates that support control strategies from basic voltage-based control to advanced single-pole kVAR control with voltage override. Some of the software templates also support other control strategies such as current, power factor, and time.

➤ **Plug-and-Play Configurations.** SEL offers a selection of compact enclosures and full-size enclosures for application in different environments and installation sites. Rugged military-grade cables allow direct connections from the SEL-734B controller to line-post sensors and capacitor switches.

➤ **Advanced Power Quality Monitoring and Trending.** All SEL-734B models include harmonic measurements, load profile trending, voltage sag/swell/interruption (VSSI) recording, and waveform capture. The Advanced Power Quality and Monitoring option measures harmonics to the 50th order, captures waveforms at 8 kHz, and offers 192 channels of profile trending.

➤ **SEL DNA™ (Distribution Network Automation) Ready.** Capacitor controls are integral to system-wide volt/VAR control schemes. The SEL-734B integrates seamlessly into system-wide distribution control schemes to linearize voltage profiles and minimize VAR-induced I^2R losses.

➤ **Auxiliary Power Supply to Power Accessories.** The SEL-734B can be configured with an optional 15 Vdc auxiliary power supply. The auxiliary power supply can be used to power accessories such as radios, clocks, and cellular routers.
Power Quality and Recording Options

The SEL-734B is available with two different power quality and recording options. These features and their specifications are shown in Table 1.

The enclosure version of the SEL-734B is available in two form factors: compact and full size.

**SEL-734B Compact Enclosure**

**Applications**

The compact enclosure provides single-phase voltage and single-phase current monitoring (6-jaw and 7-pin) and three-pole control in a small outdoor IP45-rated fiberglass enclosure. The compact enclosure can be configured to have socket-based connectors or a 7-pin connector. The socket-based enclosure is available in two different 6-jaw form factors (Option A, Option B) and one 4-jaw form factor. The Connectorized® enclosure has a 7-pin circular connector on the bottom for a control and measurement cable connection to a junction box.

**Control Strategies**

The compact enclosure supports the following capacitor bank control strategies:

➤ Voltage
➤ kVAR*
➤ Power Factor*

➤ Current*
➤ Time of Day
**Features**

- SCADA, Auto, and Manual control modes
- Front-panel control and indicators
- Hunting prevention
- Adaptive voltage and kVAR processing*
- Voltage sensor phase and magnitude correction
- Current sensor phase and magnitude correction*
- Neutral unbalance alarm and lockout**
- Integrated 15 Vdc power supply for accessories
- LEA current measurement inputs*
- Harmonic measurements and lockout
- Overvoltage lockout
- Door switch with SCADA alarm***

*Available with the 6-jaw and 7-pin versions only.
**Available only with the 6-jaw Option A and 7-pin versions.
***Available only with the socket-based enclosures that are equipped with a ground lug.

**Interface Options**

The following field interfaces are available in the compact enclosure:

- 4-Jaw Socket-Based
- 6-Jaw Option A Socket-Based
- 6-Jaw Option B Socket-Based
- 7-Pin Connector-Based (Connectorized)

### 4-Jaw and 6-Jaw Option A and Option B Socket-Based Models

![4-Jaw Meter Socket](image1)

![4-Jaw Socket-Based Version](image2)

![6-Jaw Meter Socket](image3)

![6-Jaw Socket-Based Version](image4)
Connectorized (7-Pin)

The enclosure contains one Amphenol® MS1302A20-15P circular connector that routes all measurement and control signals.

IA: Phase Current Sensor, Common
•IN: Neutral Current Sensor Input, Positive Polarity
NOTE: The ground lug is isolated from the control power transformer neutral.

SEL-734B Full-Size Enclosure

Applications

The full-size enclosure allows three-phase monitoring and ganged three-phase or individual phase control. Two enclosure styles offer flexibility: a combined sensor connector option and an individual sensor connector option. The combined sensor connector is intended for three-phase monitoring. Individual sensor connectors provide the option of single-phase monitoring or three-phase monitoring. Both styles are available in standard IP45-rated outdoor fiberglass enclosures.

Control Strategies

The full-size enclosure supports the following control strategies:

➤ Voltage Control—Ganged three phase or individual/single phase
➤ VAR Control—Ganged three phase or individual/single phase
Features

➤ SCADA, Auto, and Manual control modes
➤ Front-panel control and indicators
➤ Hunting prevention
➤ Sensor phase and magnitude correction
➤ Neutral unbalance alarm and lockout
➤ LEA voltage measurement inputs
➤ LEA current measurement inputs
➤ Switch monitoring through 52a/52b contacts and alarm

➤ Harmonic measurements
➤ Fault detection and indication
➤ Overvoltage lockout
➤ 15 Vdc power supply for accessories

Full-size enclosures include additional space to install one or more of the following SEL accessories:

➤ SEL-9322 15 Vdc Power Supply
➤ SEL-2401 Satellite-Synchronized Clock
➤ SEL-3031 Serial Radio Transceiver
➤ Other accessories

Figure 4 Full-Size Enclosure

Interface Options

The following field interfaces are available in the full-size enclosure:

➤ Combined sensor connector
➤ Individual sensor connectors

Combined Sensor Connector

The enclosure contains one 14-pin connector for all sensors and one 19-pin connector for three capacitor switches. The 14-pin connector connects to three primary current/voltage sensors and one neutral current sensor. The 19-pin connector connects to three capacitor bank switches.

Figure 5 Combined Sensor Connector Option
Individual Sensor Connectors

Three 4-pin connectors, located on the bottom of the enclosure, route each measurement signal to the SEL-734B.

Operators can choose to use one, two, or all three sensor inputs. Settings allow you to configure the SEL-734B for a different number of sensors. The enclosure contains the following connectors:

- Three 4-pin connectors connect to each primary sensor
- One 4-pin connector connects to a neutral current sensor and a 120 Vac control power transformer (CPT)
- One 19-pin connector connects to three capacitor bank switches

## Specifications

### Compliance
- Designed and manufactured under an ISO 9001 certified quality management system
- Radiated Emissions: FCC Part 15; Class A
- SEL-734B Device: UL Listed to U.S. and Canadian safety standards (File E212775, File E220228; NRAQ, NRAQ7, File E475839; NRAG, NRAG7, File E470448)

### General
#### Frequency and Rotation
- 60/50 Hz system frequency must be specified at time of order. ABC/ACB phase rotation is user settable.
- Frequency tracking range: 45 to 65 Hz (V_A or V_C required for frequency tracking).

#### Power Supply
**Continuous Operating Limits**
- 125/250 Volt Supply: 85–264 Vac (50/60 Hz)
- 24/48 Volt Supply: 19–58 Vdc
- 12/24 Volt Supply: 9.6–36 Vdc
- VA Rating: <40 VA/15 W maximum
- Ripple (IEC 60255-11:1979): 5% for dc inputs
- Terminal Voltage Dropout: <40 V within 1 minute of power removal
- Rated Insulation Voltage (IEC 60664-1:2002): 300 Vac
- Dielectric Test Voltage: 2.8 kVdc
- Rated Impulse Voltage (IEC 60664-1:2002): 4000 V

#### Instantaneous Metering/Monitoring
**Instantaneous (25 ms):**
- Frequency: ±0.01 Hz
- Power (kW) per Phase and Total: ±2%
- Reactive Power (kVAR) per Phase and Total: ±2%
- Apparent Power (kVA) per Phase and Total: ±2%
- Power Factor, at Unity PF: ±2%

**Harmonic Accuracy per IEC 61000-4-7 (2002-08):**
- THD and THDG: ±5% typical, ±10% worst case
- K-Factor: ±5% typical, ±10% worst case
- Distortion Power: ±3% typical, ±10% worst case
- Flicker PST: ±5% over the range 0.5–25 PST (10-minute interval)
- PLT: ±5% over the range 0.5–25 PLT (2-hour interval)

### Three-Phase Voltage Measurement Inputs, Low-Energy Analog (Full-Size Enclosure)
#### Three-Phase Wye (Line-to-Neutral) Voltage Measurement
- Input Impedance: 10 MΩ
- Range: 0.40–25 Vac
- Accuracy: ±0.2%
- Maximum Rating: 300 V continuous
- 600 V for 10 seconds

#### Single-Phase AC Voltage Measurement Inputs (Compact Enclosure)
- Input Impedance: 10 MΩ
- Range: 57–150 V
- Accuracy: ±0.15%
- Maximum Rating: 300 V continuous
- 600 V for 10 seconds

### Current Measurement Inputs, Low-Energy Analog
#### Single-Phase input for compact enclosure models
- Three-phase inputs for full-size enclosure models
- Neutral current measurement input on select models
- Input Impedance: 1 MΩ
- Range: 0.1–12.5 Vac
- Accuracy: ±2%
- Maximum Rating: 100 V continuous
- 200 V for 10 seconds

### 15 Vdc Integrated Power Supply
**Continuous Operating Limits**
- Rated Input Voltage: 110–240 Vac (50/60 Hz)
- Input Voltage Range: 85–264 Vac (50/60 Hz)
- Input Current: <1 A at 85 Vac
- Output Voltage: 15 Vdc ±5% for accessories, as power supply only
- Output Current: 2.75 A for accessories, as power supply only

**Ride-Through Performance (With a 25 W Auxiliary Load)**
- 120 Vac Input: 50 ms
- 125 Vdc Input: 20 ms

### Safety
#### Isolation Rating
- 2.5 kVac minimum at 60 Hz

#### Insulation Rating
- 300 Vrms (IEC 60664-2:2002)

#### Impulse Rating
- 4 kVpk (1.2/50 µs per IEC 60664-1:2002)

#### Overvoltage Category
- II (IEC 60664-1:2000)

#### Insulation Type
- Reinforced for Input-to-Output (IEC 60664-1:2000)
- Basic for Input-to-Input (IEC 60664-1:2000)

### Compact Enclosure Output Contacts
Output ratings were determined with IEC 60255-23:1994, using the simplified method of assessment.

#### Make Rating
- 250 Vdc, 7.2 kV A (Cos theta = 1), 30 A per IEEE C37.90-1989
- Carry: 8 A at 120 Vac, 50/60 Hz
Durability: >100,000 cycles for:
- Three motor-operated switches as high as 1/4 HP each
- Three solenoid-operated switches as high as 12 A each

Pickup/Dropout Time: <35 ms

Maximum Operating Voltage: 240 V
Rated Insulation Voltage: 300 V

**Full-Size Enclosure Output Contacts**

Make Rating: 3.6 kVA (Cos theta = 0.3), 30 A per IEEE C37.90-1989
Break Rating: 360 VA (Cos theta = 0.3)
Carry: 3 A at 120 Vac, 50/60 Hz
1 s Rating: 50 A
Durability: >10,000 cycles at rated conditions

Pickup/Dropout Time: <25 ms

Maximum Operating Voltage: 250 V
Rated Insulation Voltage: 300 V

**Dielectric Test**

LEA Current Measurement
- Inputs: 1.0 kVac for 1 s
- Voltage Inputs: 2.2 kVac for 1 s
- Optoisolated Inputs and Output Contacts: 2.2 kVac for 1 s
- AC Power Supply: 3.11 kVdc for 1 s

**Processing Specifications**

**AC LEA Inputs**
- 16 samples per power system cycle for instantaneous quantities
- 8000 samples per second for rms quantities and harmonics
- 3 dB low-pass filter cut-off frequency of 3000 Hz
- Control Processing: 25 ms processing interval

**Type Tests**

**Electromagnetic Compatibility Immunity**

Surge Withstand Capability:
- IEEE C37.90.1-2002 Elec. Relays
  - 2.5 kV oscillatory, 4 kV fast transient
- IEC 60255-22-1:2007
  - 2.5 kV peak common, 2.5 kV peak differential mode, 1.0 kV peak common mode on communications ports

Surge Immunity:
- IEEE 62052-11:2003
  - SEL-734B Device: 4 kV for current, voltage, and power supply mains; 1 kV for LEA inputs and auxiliary circuits
  - Compact Socket-Based Enclosure: 6 kV for power supply mains, 4 kV for voltage inputs, 1 kV for LEA current inputs and auxiliary circuits

Power Frequency Magnetic Field Immunity:
- IEC 61000-4-8:2009
  - 1000 A/m for 3 seconds, 100 A/m for 1 minute

Pulse Magnetic Field Immunity:
- IEC 61000-4-9:1993
  - 1000 A/m

Electrostatic Discharge Immunity:
- IEC 61000-4-2:2008
  - Elec. disturbance, Section 2: ESD, Severity Level: 4
  - Elec. disturb. Section 2: ESD, Severity Level: 4; both polarities at Levels 1, 2, 3, and 4

Radiated Radio Frequency Immunity:
- IEC 61000-4-3:2010
  - Severity Level: X (15 V/m)
  - IEC 60255-22-3:2007
  - Elec. relays, Section 3: Radiated electromagnetic field disturb., Severity Level: 3 (10 V/m)
  - Severity Level: 15 V/m

Conducted Radio Frequency Immunity:
- IEC 61000-4-6:2008
  - Severity Level: 3

Fast Transient/Burst Immunity:
- IEC 61000-4-4:2011
  - Severity Level: 4

**Physical**

**Operating Temperature**

SEL-734B Device: IEC 60068-2: –40° to +85°C
(-40° to +185°F)

LCD: –20° to +70°C
(-4° to +158°F)

Device in Compact Enclosure With Integrated 15 Vdc Power Supply
- 0 W of Accessories: –40° to +65°C (–40° to +149°F)
- 15 W of Accessories: –40° to +60°C (–40° to +140°F)
- 40 W of Accessories: –40° to +50°C (–40° to +122°F)

Without Direct Sunlight: Increase max. temperatures by 15°C (27°F)

Device in Full-Size Enclosure
- 0 W of Accessories: –40° to +70°C (–40° to +158°F)
- 15 W of Accessories: –40° to +65°C (–40° to +149°F)
- 30 W of Accessories: –40° to +55°C (–40° to +131°F)

Without Direct Sunlight: Increase max. temperatures by 15°C (27°F)

**Dimensions**

SEL-734B Device Dimensions: 5.7" x 6.63" x 7.56"
Compact Enclosure Exterior Dimensions: 13.7" x 11.8" x 8.0"
Full-Size Enclosure Exterior Dimensions: 18.0" x 16.0" x 10.9"

**Weight**

6-Jaw Compact Enclosure Model: 8.8 kg (19.4 lb)
(including SEL-2401 and SEL-3060)
Full-Size Enclosure Model: 12.0 kg (26.5 lb)
(including SEL-2401, SEL-3031, and SEL-9322)
Environmental Tests

Cold: IEC 60068-2-1:2007
- Envir., Test Ad, Severity: 16 hours at -40°C

- SEL-734B device, Severity: 16 hours at +85°C
- Device in Cabinet, Severity: 16 hours at +70°C

Damp Heat, Cyclic: IEC 60068-2-30:2005
- Basic envir., Part 2: Test Db
  - Severity: 25° to 55°C, 6 cycles, 95% humidity

Enclosure Protection: IEC 60529:2001, IP45

Seismic (Compact Enclosure Only): IEC 60255-21-3:1993
- Class 2 Response (Method A)

Safety

Dielectric Strength/Impulse:
- IEC 60255-5:2000
  - Elec. relays, Part 5: Insulation, Section 6:
    - 2.5 kVac on ac current inputs, contact inputs, and contact outputs
    - 3.1 kVdc on power supply
    - 2.2 kVdc on EIA-485 port for 60 sec.
  - Severity:
    - 2500 Vac on analog inputs, contact inputs, and contact outputs
    - 3100 Vdc on power supply
    - IEC 60255-5:2000
    - 0.5 Joule, 5 kV on power supply, contact inputs, contact outputs, ac current inputs, and voltage inputs
    - Section 8: Impulse Voltage: 2200 Vdc on EIA-485, Severity Level: 0.5 Joule, 5 kV

High-Voltage Line Surges

SEL-734B Device: IEC 61000-4-5:2005
- Level 4 (4 kV) on LEA voltage measurement inputs and power supply inputs.
- Level 2 (1 kV) on LEA current measurement inputs and auxiliary circuits

SEL-734B in Compact Socket-Based Enclosure:
- Location Category B (6 kV) on LEA voltage measurement inputs and power supply inputs
- IEC 61000-4-5:2005
- Level 2 (1 kV) on LEA current measurement inputs and auxiliary circuits

Impulse Voltage Test: IEC 60060-1
- 4 kV on power supply, ac current inputs, and voltage inputs

* Unless specified otherwise, all ratings apply to the SEL-734B device.
