

Control System Solutions for the Water and Wastewater Industry

Flexible I/O for automatic control, SCADA, station integration, remote monitoring, and plant control systems.

Pump control package built on the ultrareliable SEL-2411 Programmable Automation Controller.

NEW

SEL-2411 Pump Package

Pump Automation System Applications

- Wells
- Booster Pumps
- Lift Stations
- Scum Pits
- Irrigation, Storm, Reuse
- RTU Replacement

Features

- Complete System
- Conformal Coating Available
- Customizable
- Local/Remote Control and Monitoring

Making Electric Power Safer, More Reliable, and More Economical®

Control System Solutions for the Water and Wastewater Industry

- Prewired
- Preprogrammed
- Panel Switches
- SEL Support
- SEL Reliability
- Unmatched SEL Warranty

Build your control system, and customize with the following options:

Multiple enclosure and mounting options.

Optional panel-mount HMI for intuitive graphical display and easy setpoint changes.

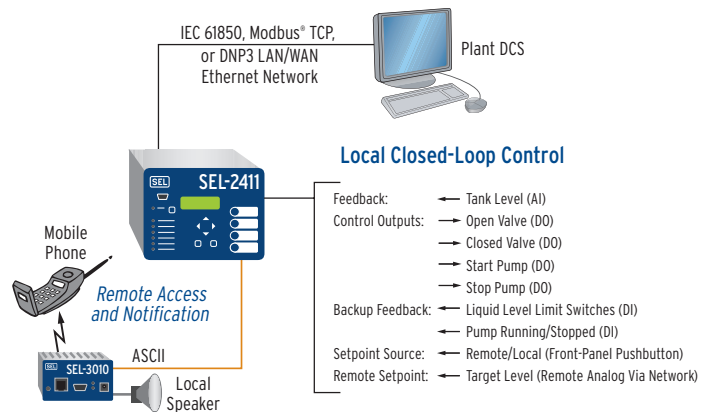

Optional serial or wireless encrypted communications for secure access.

Optional SEL-3010 Event Messenger autodialer and event notification.

Complete control system built on the SEL-2411 Programmable Automation Controller.

Level control example.

Vibration (15 g Shock)

Electrostatic Shock (15 kV)

*Heat (+85°C)
Cold (-40°C)*
