⁽¹⁾ There are three Power/Serial Communications Options as depicted in the diagrams below.

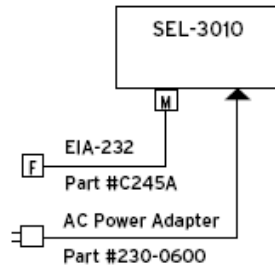

For the following diagrams, **F** = female connector and **M** = male connector.

No Accessories

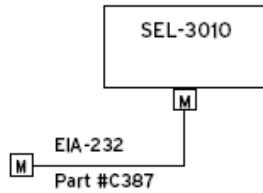

You must provide your own power and serial communications cabling

Externally Powered

Includes a power supply and serial communications cable at your specified length

Port Powered

Includes a serial communications cable that delivers power via pin 1 - an external power supply is not needed. Compatible with selected SEL communications processor ports that have a power jumper installed.

Note: You must provide your own telephone cable.
