Distribution System Protection Track

This track is designed for individuals who want to specialize in distribution protection.

The distribution system protection track introduces students to SEL relays and distribution in both fundamentals and hands-on environments.

Students who register for all courses needed to fulfill the requirements of this track receive a 10% discount on those courses and any others in the track. You must register for courses at the same time to take advantage of this discount.

Optional Introductory Courses

Course Title	Days	CEUs
