Transmission Line Protection Track

This track is designed for individuals who want to specialize in transmission system protection. The transmission line protection track introduces students to SEL relays and transmission in both fundamentals and hands-on environments.

Students who register for all courses needed to fulfill the requirements of this track receive a 10% discount on those courses and any others in the track. You must register for courses at the same time to take advantage of this discount.

Optional Introductory Courses

Course Title	Days	CEUs
PWRS 400: Power System Fundamentals for Engineers	4	2.8
PROT 300: Symmetrical Components: Theory and Application	3	2.1

Required Courses

Course Title	Days	CEUs
PROT 401: Protecting Power Systems for Engineers	5	3.5
PROT 407: Transmission Line Protection	3	2.1

Elective Courses (Choose two or more of the following courses.)

Course Title	Days	CEUs
APP 311L: SEL-311L Line Current Differential Relay	2	1.4
APP 421: SEL-421 Protection, Automation, and Control System	3	2.1
APP 411L: 87L Functions in the SEL-411L Relay	2	1.4
